BHT and BHMT - 3rd Edition
A. F. Mills & C. F. M. Coimbra

Instructions for running BHMT, HT and MT on OS-X or Windows platforms:

The most versatile versions of the BHMT, HT and MT programs run on a platform-independent DOS emulators. To run these programs from your Mac or Windows computer you will need to install a DOS emulator. The most popular DOS emulator for both Mac and Windows users is DOSBox.

1. Download the latest version of DOSBox for your operating system at
         http://www.dosbox.com
and install DOSBox on your machine

2. Create a "C:\dosprogs" or equivalent directory

3. Create a "BHT" folder inside "C:\dosprogs"

4. Download HT.zip, unzip and select the executable file (HT_SRC.exe) you wish to use from https:// https://temporalpublishing.com/bht_students/

5. Copy the *.exe into their respective folders

6. Execute the "DOSBox" program

7. Enter the command "mount C C:\dosprogs\"

8. Enter the command "C:" to change the mounted drive

9. Enter the command "cd BHT"

10. Enter command "BHT_SRC" to unpack programs

11. Repeat Steps 9 and 10 for the additional software package. Use "cd .." to move up on directory.

12. To execute program XX (e.g. BHMT, HT or MT), enter "cd XX" and then XX again at the DOS prompt to execute the menu program

13. You will need to enter the "mount C C:\dosprogs" each time you restart the "DOSBox" program.
